Bright and Shine

Whether you are conducting a meeting in an open space or in solarium, Quriosity adjusts the brightness of the display as per environment and presents all the brilliant ideas on a bright and high-resolution display, full of intensely saturated colours with superbly contrasting fonts, making it more impactful.

450 NITS BRIGHTNESS

ULTRA UHD DISPLAY

Built-in Speakers

Want to play a video or conduct a video call with remote teams, the built-in speakers in the panel amplifies the sound and present it with the utmost clarity. The panel has bottom firing 15 watts Stereo Speakers, producing loud and clear sound.

TOUCH
ACCURACY +/-1MM

SMOOTH AND FAST

Ultra- Smooth Writing

Advance Ultra Light Wave Technology, ensure there is almost zero pre-activation, giving very accurate, precise and smooth writing experience. Using Ultra Light Wave Technology, Curiosity delivers the highest touch precision writing experience on the digital canvas, with touch accuracy of +/-1mm. It comes with a thin nib passive stylus that allows users to write and draw in the pixel perfect precision, ensuring zero lag.

PALM ERASING

GESTURE CONTROL

FINGER-TOUCH WRITING

Gesture Control

Gestures elicit touch interaction directly with the panel, and enhances the user experience to manipulate the on-screen activities, navigate, or erase directly from the hand.

ULTRA SLEEK DESIGN

AVAILABLE IN 4 SIZES

ANTI-GLARE COAT

TOUGHENED GLASS WITH LEVEL 7 HARDNESS

Quickest to Set Up

Unbox the device, plug-in, and it's ready to use. That's all. Forget the struggle of choosing the right cable, connecting various devices, and setting up a perfect meeting room. Quriosity ensures every meeting is perfect and productive.

Layers of Protection

Designed to address all the safety needs of panel, the device is protected with a toughened glass that makes it robust enough to withstand scratches and adjust under different variations of temperature. The slim frame display around the panel enhances the look.

Ideation and Brainstorming

Infuse your meeting with your knowledge and creativity to foster engagement using smart tools, which assists you to write and annotate in different hues, draw in perfect shapes, reads your handwriting and convert into digital text, and allows replaying of the pages infinite times. Achieve more in less time.

CAPTURE AND ANNOTATION

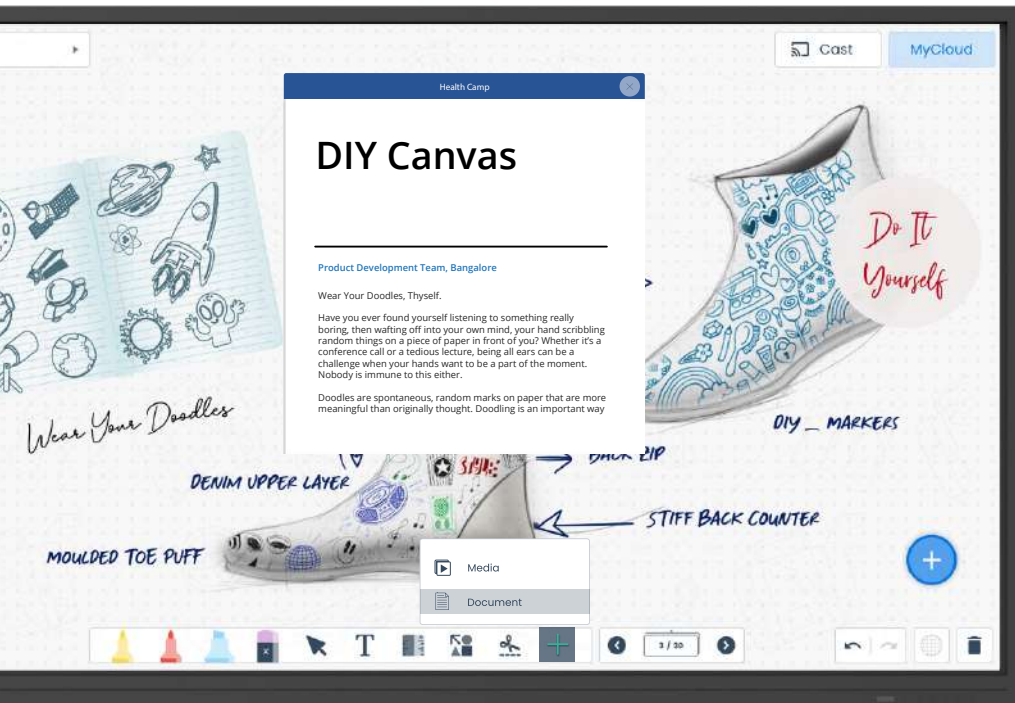

INTERACTIVE TOOLS

Drag and drop templates

Compatibility and Support

Curiosity supports any web browser and compatible with all office applications and support all formats. It allows you to cast the screens of PC / laptop, tablet or mobile with no physical connection.

WIRELESS SCREEN CAST

Contribute Together Achieve Better

Participate without any wait. To promote active participation in group dynamics, Quriosity allows multitouch interactions on the display simultaneously, enabling participants to quickly add their inputs. Write or draw using passive stylus or finger, or both.

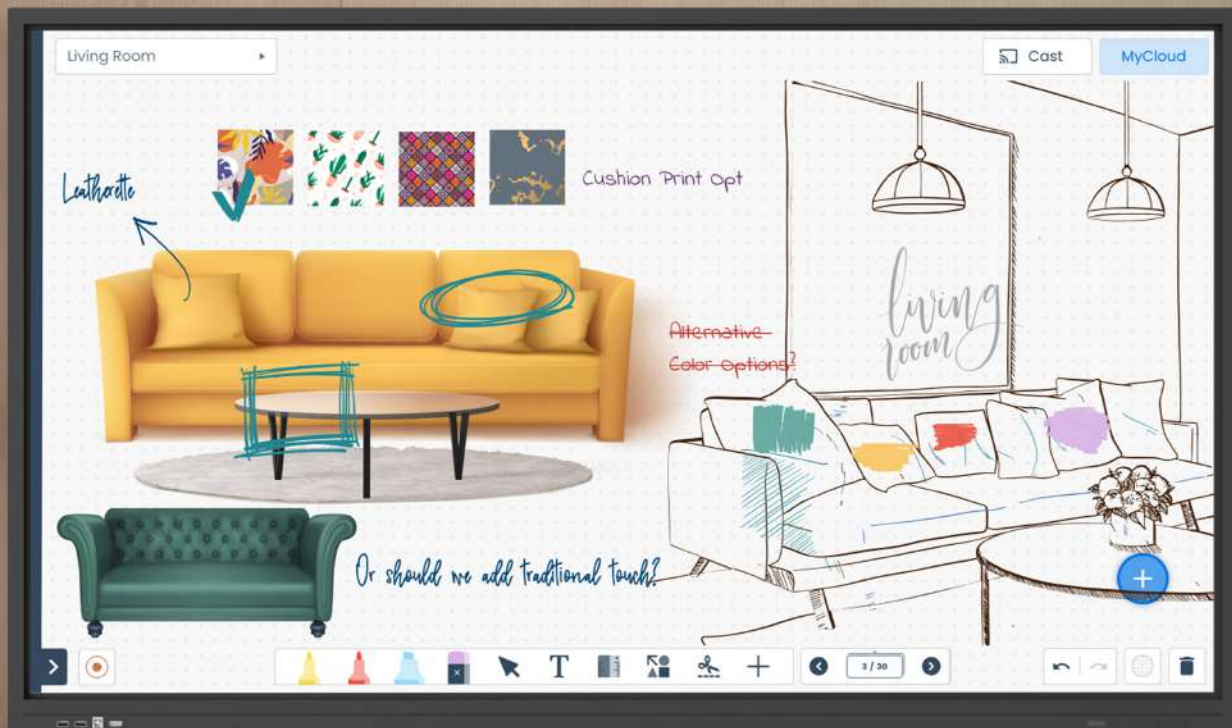

Multitude of choices to share content and ideas :

Share the data or mirror your screen on the bigger display. Compatible with Windows®, Android™, macOS® and iOS, Companion app lets you share almost any form of content – word, presentation, spreadsheets with just a tap on the digital canvas. Or you can connect your Windows® PC & Mac® through USB and control it with touchback functionality. Another option is screen mirroring technology through which participants can wirelessly cast presentations, excel sheets, videos or any other form of content directly from their devices onto the collaborative canvas.

Multi-user Collaboration

Wireless Windows
Touchback

Screen Mirroring

USB

PC/Laptop

Tablet/Mobile phone

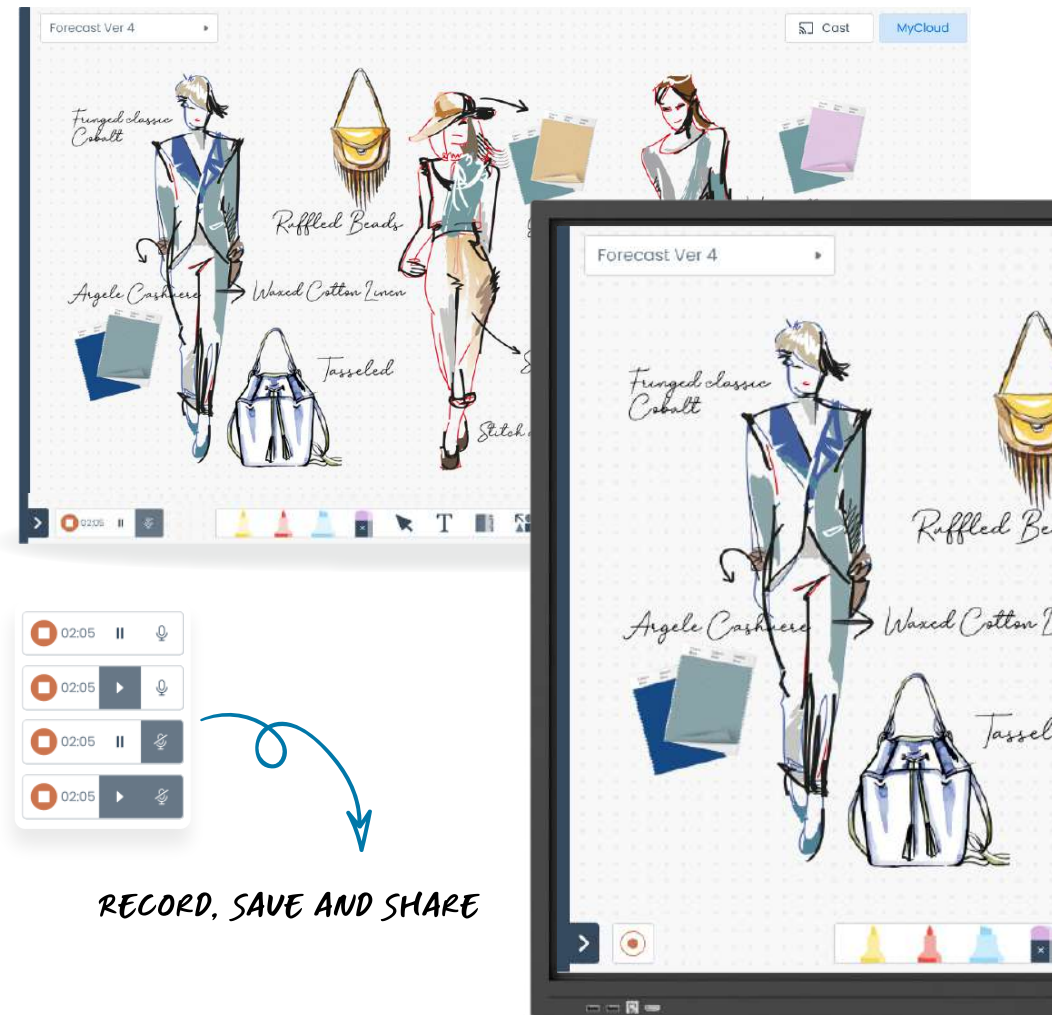

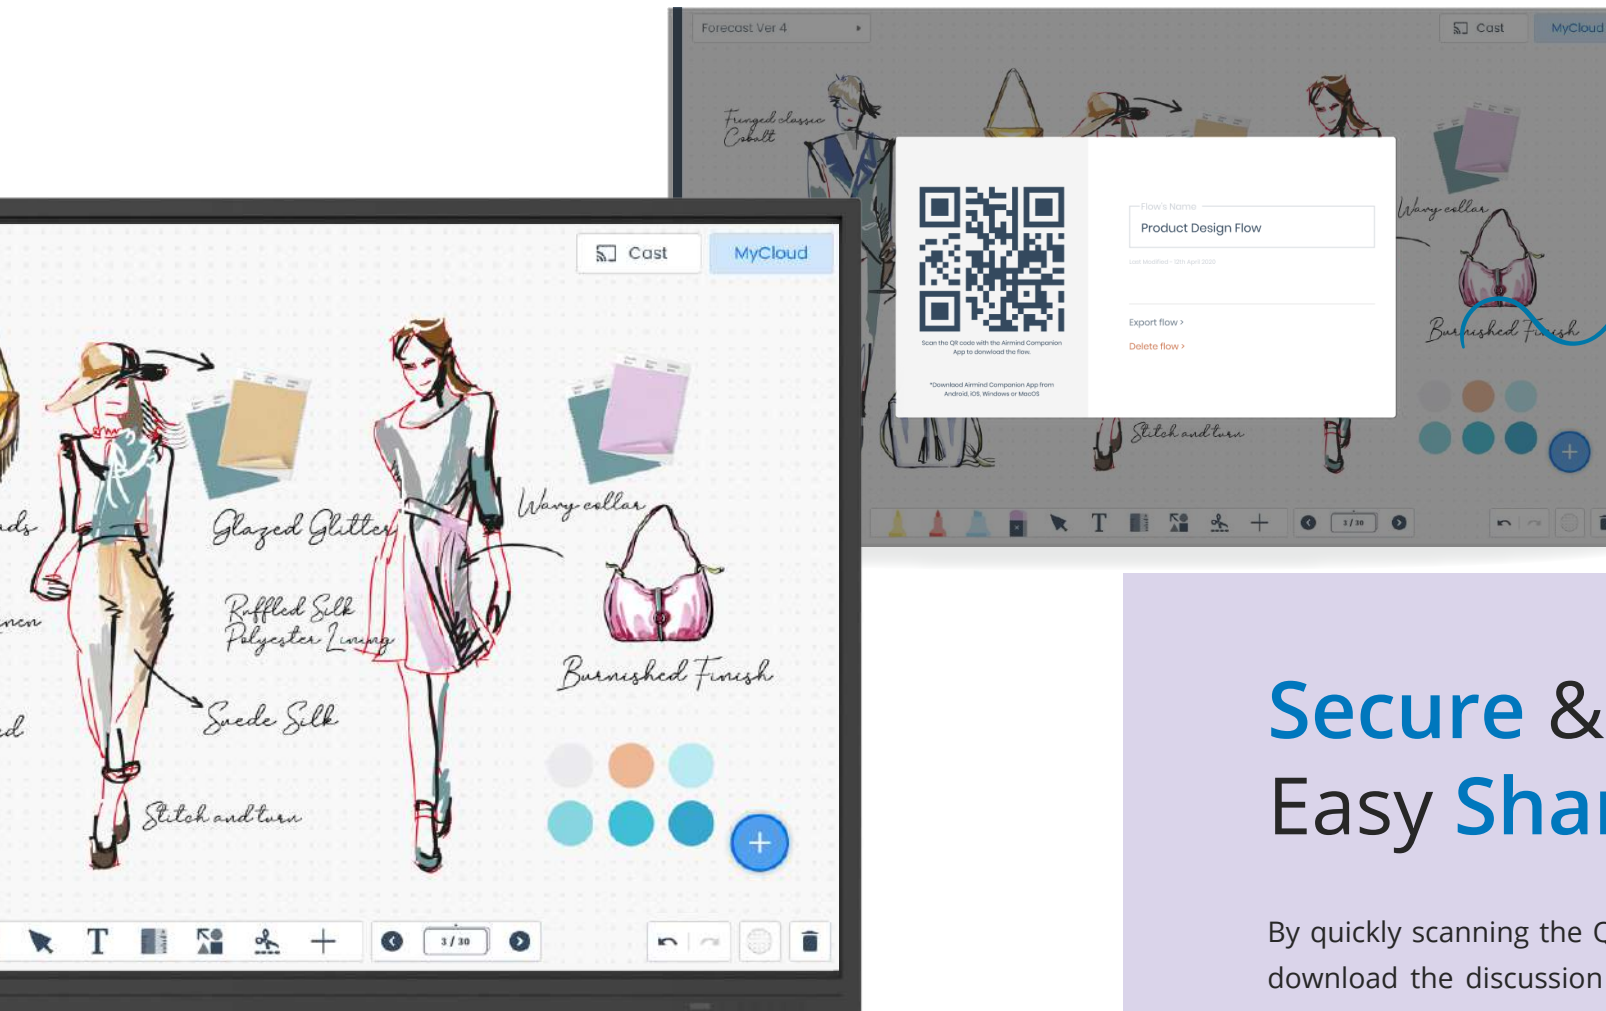

Record Meetings

Don't worry about documenting meetings anymore. Quiriosity lets you record audio and video sessions. Participants can also print the screen, saving time and preventing ideas from being erased or lost forever.

Pages for Unlimited Ideas

Explore different variations of an idea allowing multiple voices in your team on the unlimited pages of the digital canvas, without any fear of running out of space or losing the content. Moreover, you can keep a track of discussion during the meeting.

SCAN AND SHARE
THE DISCUSSION
IN PDF FORMAT

Secure & Easy Sharing

By quickly scanning the QR Code, users will be able to download the discussion in the form of a PDF file on their own devices. Moreover, remote participants can use Global access code to download the discussion. All the shared files are end to end encrypted, using secure AES 128bit & 256bit level encryption policy.

Video Conferencing

Thinker View* with in-built 1080p camera with ultra-wide-angle delivers an immersive video in the meeting room, marking everyone's presence, irrespective of size of the meeting room. The beamforming mic array has Voice Activity Detection (VAD) and Direction of Arrival (DOA) feature captures the voice from still or moving sources by focusing directly on the speaker while suppresses the background noise with full-duplex Acoustic Echo Cancellation (AEC).

Transform any Meeting Space

The all-in-one panel comes fitted with all the essential components of modern meeting space, infused with all the high-end technologies. Regardless of industry, work environment, and size of meeting room, Quriosity accommodates every need of different teams.

For unlimited Planning and Scheduling

For teams working on multiple projects and assignments, Quriosity gives more freedom to sync up and plan their priorities. Participants can write simultaneously, and open their favorite project management tools like Trello, Jira etc to streamline their tasks and status.

For unlimited creativity

Explore unlimited tools to give shape to your imagination. Play with colours and fonts and communicate your stories effectively, with just your handwriting. Quriosity has all the smart tools and enough storage to save your creative ideas.

For unlimited brainstorming

Create, collaborate, and conclude without any delay or restriction. The panel has centralized storage space that gives an access to every stakeholder to continue from where they left, without any worry of misplacement of document. The single whiteboard offers collaboration to multiple teams, ensuring the security of data.

About Cybernetyx

Cybernetyx® is a pioneer and leader in developing Perceptual AI devices that augment our learning and thinking spaces to transform our knowledge work. In 2009, we invented EyeRIS® vision technology - that allowed machines to 'see' and understand human touch and gestures on large surfaces, and now powers products from nearly all of the leading display companies in the world such as NEC, ViewSonic, and others.
